Professional Summary

Passionate and detail-oriented MERN Stack Developer Intern with experience building responsive and dynamic web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing RESTful APIs, creating user-friendly interfaces, and collaborating in Agile environments. Quick learner, eager to contribute to real-world projects and grow within a tech-driven team.

EXPERIENCE:

Software Developer, *Liried Tech Private Limited* 

08/2025 – Present
Kochi

- Build and maintain full-stack web applications using Node.js, Express, JavaScript, HTML/CSS, and Bootstrap.
- Collaborate with cross-functional teams to develop scalable backend APIs and interactive frontend interfaces.
- Focus on performance optimization, code maintainability, and efficient deployment workflows.
- Utilize Git/GitHub for version control, collaboration, and debugging during development cycles.
-

MERN Stack Developer Intern, *Tech Maghi* 

07/2024 – 01/2025
Kochi

- Integrated 5+ APIs into a React app using Axios, cutting manual data loading by 80% and making 4 main pages more responsive.
- Received hands-on mentorship from senior developers, gaining practical exposure to agile workflows, debugging techniques, and professional software development practices

EDUCATION:

Diploma in Computer in Engineering

2021 – 2024

Plus Two

2019 – 2021

SKILL SUMMARY:

Expert in:

HTML, CSS, React JS, RESTful APIS
Express Js, Node Js, Javascript, Git,
GitHub, Team work

Familiar with:

Data Structures and Algorithms, C, Figma, Cursor AI
,Next JS

PROJECTS:

Food Ordering Website  , (*GitHub*)

- Enabled users to browse menus, add items to cart, and place orders
- Created an admin dashboard to manage menu items, categories, and order status
- Used MongoDB for storing user data, food items, and order details

- Included features like order tracking, category filters, and search functionality.

Learning Management System(LMS) [↗](#), *(GitHub)*

- Authentication and authorization with JWT
- Implemented role-based access for Admins, Trainers, and Students
- Students can browse, enroll, and access course materials
- Used MongoDB for user registration, course data

MINI PROJECTS:

Real Estate Website [↗](#), *(GitHub)*

- Designed a responsive frontend UI for a real estate listing platform using React.js
- A modern and intuitive user interface with reusable components (e.g., Navbar, Cards, Footer)

Netflix UI clone with TMDB API [↗](#), *(GitHub)*

- A responsive video streaming web application inspired by Netflix UI using React.js and CSS/Styled Components
- Integrated TMDB (The Movie Database) API to fetch and display trending movies, TV shows, and genre-based content

Blog App [↗](#), *(GitHub)*

- A full-stack CRUD blog platform using MongoDB, Express.js, React.js, and Node.js
- Enabled blog creation, editing, deletion, and detailed view
- User can Delete and Update blogs

Event Planner [↗](#), *(GitHub)*

- Built a full-stack Event Planner App using MongoDB, Express.js, React.js, and Node.js
- Connected frontend and backend using Axios for smooth data flow
- Built RESTful APIs using Express.js and Node.js
